Self Employment:

Area of Expertise:

HTML5 & CSS3 | JavaScript
ES6 | Git | GitHub |
React | NodeJS | Express.JS
| MongoDB

ABOUT ME

I'm specialized in building responsive, user-friendly web interfaces that deliver exceptional user experiences.

As a Front-End Developer, I have expertise in HTML, CSS, JavaScript, and React, along with experience in Firebase Authentication and Git and also Familiar to Node.js, Express.js, MongoDB and Next.js. I am passionate about crafting modern, scalable, and secure web solutions with a strong focus on usability and innovation.

Beyond coding, I love reading books and exploring new places through travel, which inspires my creativity and fuels my passion for continuous learning.

With a keen eye for detail, I thrive on transforming ideas into impactful digital experiences. Let's connect and collaborate to create something extraordinary!

SELECTED PROJECTS

1. Movie Portal [M-Flix] – [React.js](#) | [Express.js](#) | [MongoDB](#) | [Firebase](#)

Movie Portal is a dynamic, user-friendly platform designed for movie enthusiasts. It allows users to explore, add, update, delete and add to favorite movies. The application offers features such as adding movies to favorites, viewing detailed movie information, and deleting movies from the favorites list. It is built using React, Firebase authentication, and various UI/UX tools like Tailwind CSS, DaisyUI, and SweetAlert.
